

Visit the Night Market! There are so many ways to explore, but we recommend visiting three adjacent stalls to make an ideal meal. You can dine out for 18 nights in a row and never visit the same stall twice!

What makes a good meal? Any given three course meal has 3 attributes: food type, food colour, and the number of items. A good meal one identical attribute across all three courses, while the two attributes are completely unique. No good meal has exactly two of the same attribute.
